

I completely disagree with LPFM radio stations. Regional and National stations operating in our area via FM translators have had to pass FCC mandates and regulations in order to operate on that frequency, and therefor have earned and deserve the right to operate on that frequency. I think that it is completely wrong and totally inconsiderate to allow LPFM stations to pick whatever frequency they want, no matter if a station already exists. LPFM stations should have to apply for and AVAILABLE frequency and be held to the same mandates as larger radio stations.
